

# MEI VN2700R Bill Recycler vs. the Competition

	JCM	CMS	MEI	MEI Benefits
<b>Design type</b>	Modular	Non-modular	<b>Modular</b>	Modular approach allows for future proofing – decision to upgrade can be made now or later
<b>Physical footprint</b>	About double bill validator	More than double bill validator	<b>Smallest, about 1/3 more than bill validator</b>	Smaller footprint allows for greater variety of machine compatibility
<b>Note capacity</b>	10	1-30 programmable	<b>1-30 programmable</b>	Programmable higher capacity provides optimum float flexibility
<b>Display for contents</b>	No	Yes	<b>Yes</b>	Content display improves route driver efficiency
<b>Cassette sizes</b>	300	300 or 400	<b>500 or 700</b>	More cassette sizes improves flexibility
<b>Error diagnostics</b>	3-way LED on back of recycler	Front LEDs go red and flash	<b>2 digit rear display</b>	Using 2 digit display improves clarity of error for driver
<b>Bezels</b>	No high-visibility option	Blue LED bezel	<b>Multi-color high-visibility bezel option in VFM or compact style plus all combination cash/cashless bezels</b>	Attention grabbing light pattern with accepted denominations displayed in real time. Add cashless to accept all forms of payment
<b>Jam clearing</b>	Requires removal of recycler	Manual wheel on side of recycler – limited bill path accessibility	<b>Manual wheel – complete bill path accessibility plus tamper evident sensors</b>	Manual wheel combined with more bill path accessibility increases field fix capability. Tamper evident sensors ensure accountability
<b>Coin mech compatibility</b>	Requires extra board to interface with non-CMS mechs	Only works with CMS mechs	<b>Works with any MDB coin mech</b>	Compatibility with any coin mech allows customer to leverage existing asset base
<b>Service</b>	Limited	Limited – only via St. Louis service center	<b>All MEI ASCs</b>	MEI recycler can be serviced as bottlers are used to. Other brands require special handling
